

DOHA METAL WORKS GROUP WHY ...?

Our Distinctiveness :

- We are the oldest and largest Qatari company specializing in producing kwik span sheets in coils used for aircraft hangars, stores and car parking shades ...
- DOHA KWIK SPAN Co. owns two lines for producing kwik span sheets in coils, which enables it to control quality levels and reduce cost and time required for production to serve customers' interest.
- Quality, manufacturing and social responsibility, and transparency are firm principles for DOHA KWIK Span Co, which made its products be the most in demand and preference in the Qatari market, where we are committed to:-

Pre-painted Galvanized steel sheet thickness: DOHA KWIK SPAN Co. is keen to strictly adhere to the stated nominal thickness.

Zinc amount: It is known that the amount of zinc coating on a galvanized or colored sheets in coils under a paint layer is the decisive and most important factor in a sheet resistance to rust and air factors, so DOHA KWIK Span Co. is committed to the required zinc amount when importing raw material.

Quality of coating and painting: DOHA KWIK SPAN Co. is keen to use the best kinds of reliable high-quality paints and does not allow to use any kwik span iron sheets coated with paints containing harmful lead material.

- Diversity in sources and thicknesses.

Kwik Span sheets in coils source of origin : Saudi Arabia, Australia, Italy and UAE (thicknesses 0.50, 0.60, 0.70, 0.80 & 0.90 mm...)

- Polycarbonate sheet source of origin (Britain and Turkey (thicknesses 8 mm and 10 mm...))
- UPVC source of origin: Turkey (thicknesses 60mm and 70mm....)
- Having high-experienced engineers and technicians

- Doha Metal Works Group has a good reputation since it was founded. It is considered a leading company in its field, as well as its products were known as the most confident and demandable products in the Qatari market.
- Doha Metal Works Group is approved among government agencies.
- It is a Qatari company (100% Qatari partners).
- It provides various equipment and machines for customer service (2 kwik span machines + Gutters machine..).
- It is the only company that adds some sectors in the Kwik Span system in installation (Rubber) to separate Gutters and kwik span sheets in order to prevent the transmission of rust to kwik span roof, which helps to increase service life of products and warranty period.
- High-experienced sales team.
- Offers and prices.
